Office Action Summary	Application No. 10/759,286	Applicant(s) WATSON, DUNCAN G.	
	Examiner Gary E. Elkins	Art Unit 3727	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Sekiguchi et al (figs. 25-28 emb).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Sekiguchi et al (figs. 25-28 emb). Sekiguchi et al discloses a carton formed with a lens panel 502 secured thereto. Sekiguchi et al does not disclose formation of the carton from a blank. Official notice is taken that cartons are commonly formed from flat blanks as an intermediate product. It would have been obvious to make the carton in Sekiguchi et al from a blank since the use of blanks to make cartons is notoriously well known in this art.
5. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dupuy in view of Spaulding and either Sekiguchi et al or Chan. Dupuy discloses a transparent window panel secured inside an opening within a carton/blank. Dupuy does not disclose a graphics panel

formed with a lens. Spaulding teaches that it is known to make a container with a graphics panel 24 secured such that it can be viewed through an opening in a container. Each of Sekiguchi et al and Chan teaches that it is known to use lens type graphics panels to enhance the graphics on a container. It would have been obvious to substitute a graphics panel for the transparent panel in Dupuy as taught by Spaulding to provide an aesthetic view of the contents irregardless of the level of contents in the container. It would further have been obvious to make the graphics panel in modified Dupuy as a three dimensional graphics panel as taught by either Sekiguchi et al or Chan to enhance the aesthetic graphical quality of the image(s) being shown. Graphical displays using a lenticular lens to provide a three dimensional effect are well known.

Conclusion

The remaining cited prior art is illustrative of the general state of the art.

In order to reduce pendency and avoid potential delays, Technology Center 3700 is encouraging FAXing of responses in Office Actions to (571)273-8300. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by Applicants who authorize charges to a PTO deposit account.
